# Using BalkingBadge Application on your mobile phone
(Android 4.0 or later)

1. Set the Bluetooth visibility of your mobile phone to be "Never time out". This differs according to different mobile phone models. For example, on Galaxy Nexus, choose "Settings", "Bluetooth", "Visiblity timeout" and "Never time out" in sequence.

A:

B:

2. Download the installation package from the main page of TalkingBadge Demo website and install it, or install it from Google Play by click the corresponding link. To find the URL to the main page, you can either

Scan the QR code   or Type the URL manually

http://130.226.142.182/TalkingBadgeDemo/LogIn

3. Turn on the TalkingBadge Application, and input your TalkingBadge Demo username and password. If you do not have an account, please click "Regist" button.

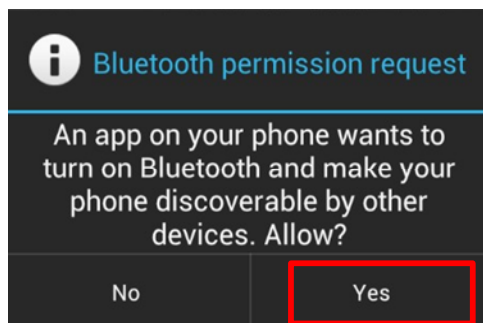

4. If Bluetooth is off on your mobile phone, a notice will pop up after you click "Log In" to ask your permission to turn on Bluetooth. Please click "Yes". After that, you have to click "Log In" again.

5. After log in, if you do not have "Bluetooth File Transfer" installed on your mobile phone, the application will suggest you to install it and make a few settings on it, so that your mobile phone can receive files by Bluetooth automatically without any extra operation. So please click "Yes" to install it.
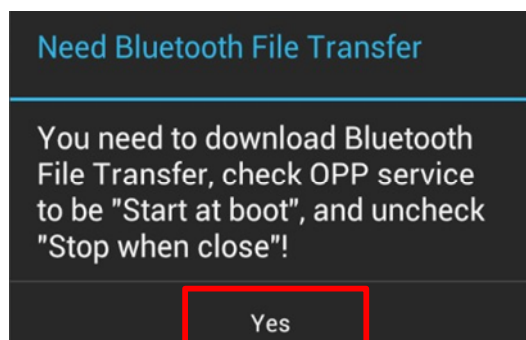

6. After downloading "Bluetooth File Transfer", turn it on, and press the "Menu" key on your mobile phone, choose "More", "Settings" and "Receiving service(OPP)" in sequence.
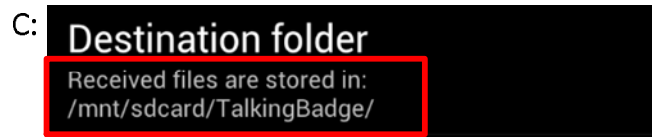

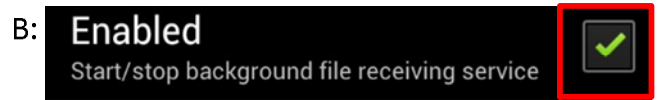

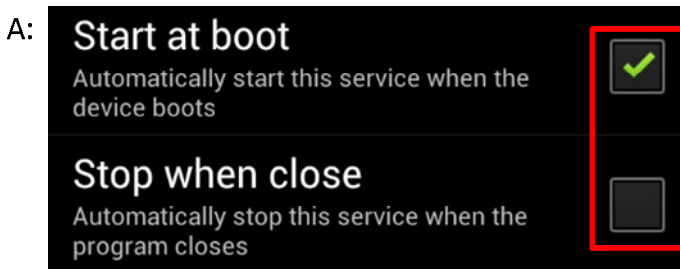

A:

Select...   Edit...   Create...

View...   Find files   More

B:

Settings

C:

Receiving service (OPP)
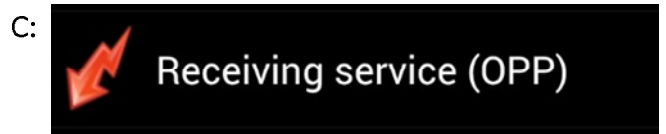

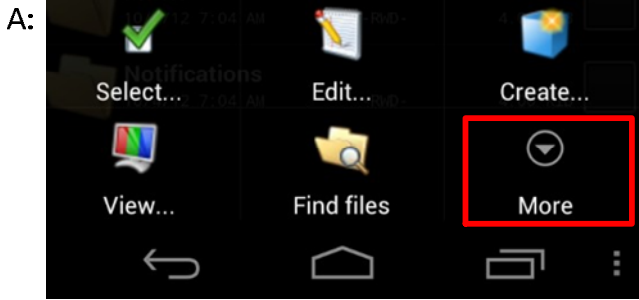

7. Make "Start at boot" and "Enabled" to be checked, and "Stop when close" to be unchecked. Set "Destination folder" to be the directory of TalkingBadge. Then please exit "Bluetooth File Transfer".

A:

Start at boot
Automatically start this service when the device boots

Stop when close
Automatically stop this service when the program closes

B:

Enabled
Start/stop background file receiving service

C:

Destination folder
Received files are stored in:
/mnt/sdcard/TalkingBadge/

8. Come back to TalkingBadge application, and you will see the following page. There are three buttons on this page, Replay, Change volume and Close the application. The functions of the buttons are showed on the picture, and now you can press the "Back" button on your mobile phone (whose position on the mobile phone differs from different phone model), and enjoy the service provided by the TalkingBadge application.

Replay button: press slowly to repeat the last message, and press quickly to hear several former messages.

TalkingBadge

Welcome to use TalkingBadge Application

Volume button: press to change volume of this application. The sequence will be Loud→Medium→Low→Silence→Low→Medium →Loud

Back button on Galaxy Nexus: press to hide this application, so that you can receiving message from TalkingBadge application when you work on something else on your mobile phone
